Back End: Node JS, Express, Sequelize, PostgreSQL, GraphQL, Next JS, MongoDB, Redis

PROJECTS

[ParkMate – CMS](#) | [github](#)

September 2024

A web-based application designed to streamline parking area management for vendors, providing an intuitive platform to easily organize and monitor parking spaces.

Tech stack: React, Next.js, MongoDB, Cron-job

[ParkMate – Mobile](#) | [github](#)

September 2024

A mobile application tailored for end-users, allowing them to easily search for available parking spots, view details, and make bookings directly from their smartphones. This app simplifies the process of finding and reserving parking spaces, making it convenient for users on the go.

Tech stack: React Native, MongoDB, Midtrans

[ZA-e-commerce | github](#)

August 2024

A web-based clothing e-commerce platform.

Tech stack: React, Next.js, Typescript, MongoDB

[X2 | github](#)

August 2024

This mobile application is a clone of Instagram's Threads, developed using React Native, Expo, GraphQL, and React Context, on the client side, with the server built using Apollo, MongoDB, and Redis.

Tech stack: React Native, React context, Expo, Apollo Server, MongoDB, GraphQL, Redis

[Takemeout | github](#)

August 2024

A mobile application designed for dating or simply chatting with strangers in real-time, offering a seamless and engaging experience for users seeking meaningful connections or casual conversations.

Tech stack: React, React context, Web Socket

[QuickRecipe | github](#)

July 2024

A web-based application that offers a variety of quick and easy recipes based on the ingredients users already have.

Tech stack: React, Redux, Express JS, PostgreSQL, Gemini, Midtrans, Cloudinary, OAuth google

[News Portal | github](#)

July 2024

A web application where users can not only browse news articles but also create, edit, and manage their own news content.

Tech stack: React, Express JS, PostgreSQL, OAuth google, Cloudinary
